

For Immediate Release

DW[®] Spectrum[®] IPVMS New v5.1 is Now Available

DW's flagship video management software delivers a simplified workflow and introduces additional system control capabilities.

DW Spectrum IPVMS

Cerritos, CA (July 18, 2023) – [Digital Watchdog[®] \(DW\)](https://www.digital-watchdog.com), the industry leader in digital recorders, surveillance cameras, system peripherals and related management software, announces the release of DW Spectrum IPVMS v5.1. The software's latest version focuses on creating a more efficient workflow for operators and providing system administrators with more capabilities to get the most out of their systems.

"From its introduction, DW Spectrum has delivered video management in a different and more dynamic way, easier for the user to operate as well as faster to find and export critical video clips," said Mark Espenschied, Director of Marketing, DW. "With each major revision, that commitment to power and ease of use is further realized by adding intuitive features that harness ever-evolving video surveillance technology."

New features include:

- Cross-system layouts: Users and operators can view cameras and devices from different Cloud systems on a single layout on their desktop client.
- Camera replacement: System owners and Administrators can replace a camera with another camera from the same Server. A camera's name, archive footage, and settings can be transferred, making defective camera replacement simple and safe without losing existing settings and archive footage.
- Users and operators can download the Desktop Client and Server logs remotely.
- When adding a new camera to a Server, users and operators can choose the ONVIF profile for the camera.

DW Spectrum IPVMS is freely distributed, including the DW Spectrum server and client software (Windows®/Linux®/Mac®), the DW Cloud (dwspectrum.digital-watchdog.com) web client from all leading web browsers (Google® Chrome, Firefox®, Internet Explorer®, Safari® and Opera®), as well as the free DW Spectrum mobile app for iOS and Android devices. The DW Spectrum IPVMS server software includes pre-configured DW Blackjack® NVR servers and MEGApix® CaaS™ edge cameras or can be installed on third-party Windows or Ubuntu® Linux-based systems.

DW Spectrum IPVMS updates automatically in systems where previous v3.2 and later software is installed. Click [here](#) to download the software from the product page on our website, or go to www.digital-watchdog.com and search for DW Spectrum.

ABOUT DIGITAL WATCHDOG

Founded in 1987, DW is a leading manufacturer of NDAA/TAA-compliant complete surveillance solutions, offering stunning image quality, advanced hardware capabilities, superior video management, reliable customer support and the lowest total cost of deployment for IP megapixel, Universal HD over Coax® megapixel and legacy analog
